Key Points in the Memo:

- Differentiation rules: Power rule, product rule, quotient rule, chain rule.
- Integration techniques: Basic indefinite integrals, substitution.
- Application: Find gradients, tangents, areas under curves.

Expert Insights:

Students often make errors in applying rules or forget to include the constant of integration where relevant. The memo emphasizes showing all steps and units, and carefully interpreting results in

context.

Marking Scheme and Partial Credit Allocation

An essential aspect of the memo is the detailed breakdown of how marks are awarded:

- Method marks: For applying correct procedures, even if the final answer is incorrect.
- Accuracy marks: For correct final answers, with deductions for errors.
